Electrical access control system for the guests of Balatontourist Camping Füred

1. Purpose and use of the access control system:
   - The access control system has been installed in order to maintain the security and calmness of our visitors.
   - By means of this system visitors and employees of the camping can access to the assigned areas.
   - Using the access control system is obligatory for every visitor and employee who wants to enter the campsite.
   - Registration always takes places at the reception.
   - Guests who registered in the system are entitled to use the electric gates in the camping area.
   - Cars can enter by license plate identification. The barriers open automatically upon exit. The barriers allow only one vehicle at a time upon enter and exit.
   - When arriving on foot, every person must use its own wristwatch or armband at the points of entry. Passing through for a group with one identification device is irregular.

2. Access cards and identifiers:
   - A unique access card or armband will be provided to every guest.
   - Access cards / armbands can only be used by the owner, and it is forbidden to loan or give it to somebody else.
   - We give the access cards / identifiers upon arrival, and it must be returned before leaving.

3. Lost or stolen cards
   - In case the guest loses the access card/armband, it must be reported at the reception immediately.
   - In case of lost or stolen cards / armbands we take all the necessary measures in order to maintain security, including disabling or replacement of the card / armband.

4. Appropriate usage:
   - While using the access control system, every guest and visitor must respect the operating rules of the system and the entitlement of others.
   - The armband or the programmed wristwatch is personal and shall not be handed over to anyone else. The armbands cannot be removed without destruction, once removed they are not valid anymore.
   - We ask every guest and visitor to wear the identifier on your wrist all the time when leaving the campsite and the beach, and please show it to the personnel upon request.
   - At the entry points and gates valid armband or programmed wristwatch is necessary.

5. In case of system error or problem:
   - In case of any error or problem regarding the access control system the technical please inform the personnel or the reception immediately.
   - A CC telephone system is working at the entry points, with its help the reception can help you enter or exit.
   - Depending on the urgency of the problems we apply alternative accessing methods or solutions in order to maintain security.

6. Sanctions:
   - When breaking the rules of the access control system or in case of abuse with the system the personnel of the camping will take actions, notify the authorities if necessary and if the guest fails to cooperate, he can be excluded out of the camping.

Thank you for following the rules!
